MEMORANDUM FOR: [REDACTED]

SUBJECT : National Imaging Plan for Satellites

1. The DCI has stated his desire for a National Imaging Plan and provision for one appears in the Milestones of his Objectives for the Intelligence Community for 1975. The Director of NRO and I have signed a memorandum of agreement establishing the outline, procedures and milestones for such a plan.

2. The purpose of this memo is to task you to arrange for an input to the NIPS on the subject of satellite imagery dissemination. The objective of the dissemination portion of the NIPS is to provide that part of the planning base which will make explicit current and projected imagery dissemination systems and relevant information related to their capabilities and costs. Inasmuch as the satellite imagery dissemination problem is not solely within the boundaries of the IHC, it may be necessary for you to work with the Chairman/COMIREX and make such direct contacts with DIA, NRO, and the Services as you deem necessary. The details of outline, presentation, format and scheduling should be worked out with [REDACTED] who has overall responsibility for the project.
